FACETED ANIMALS

Fauna

Faceted creatures in stone and bronze

Fauna gathers nine small animal objects, each softly faceted or gently sculpted so the creature reads at a glance yet sits quietly in a luxury room. Hare, fox, tortoise, whale, heron, ram, bear, snail and fish are reduced to confident planes and calm silhouettes, every one resting on a single defined base.

PRIMITIVE STONE FORMS

Monolith

Primitive stone forms, carried light

Monolith is a collection of nine small sculptural objects that borrow the gravity of quarried stone: split blocks, stacked slabs, carved voids and chamfered steles. Each piece reads as solid mass yet is hand-laid in fiberglass, so a 40 cm block arrives weighing less than a bag of flour.

Cleft Pair

ANCIENT GEOMETRY

First Stones

Ancient geometry, hand-laid in fiberglass.

First Stones distils the architecture and vessel forms of the ancient world into nine small, gallery-quiet objects: stepped ziggurats, fluted columns, amphora curves and temple platforms reduced to pure geometry. Each piece is scaled for desks, consoles and shelves, ships under five kilograms, and reads as carved stone or cast bronze while weighing a fraction of either.

FOLDED FORMS

Small Folds

Nine folded forms, hand-laid, shipped light

Small Folds is a collection of nine compact objects translating the discipline of paper folding into hand-laid fiberglass, each piece sized for a desk, console, shelf or wall. Every form is a single sealed shell with a defined base, so the pieces read as carved stone or cast bronze while shipping at a fraction of the weight.

BAUHAUS

Grundform

Primary geometry, hand-laid in fiberglass

Grundform is a collection of nine small objects composed from the circle, the square and the arch, each reduced to one clear gesture of Bauhaus geometry. Hand-laid in fiberglass, the pieces carry crisp edges and generous volumes at a weight that ships easily to any suite, lobby or residence.

BRUTALIST

Little Brutal

Concrete monuments scaled for the tabletop

Little Brutal shrinks the language of post-war civic concrete into nine compact objects for suites, lobbies and private residences. Stacked blocks, cantilevers, board-marked faces and deep recesses are rendered as crisp hand-laid shells that read as monolithic yet lift with one hand.

MID-CENTURY

Atomic Walnut

Mid-century silhouettes, hand-laid in fiberglass

Atomic Walnut is a nine-piece collection of small tabletop and wall objects that distil mid-century modern geometry into crisp, luxurious forms. Tapered cones, boomerang sweeps and ribbed bands are hand-laid as lightweight FRP shells, finished in walnut, brass, cream and olive for hospitality and residential trade.

COLOR POP

Tonic

Primary color, hand-laid, small and bold

Tonic is a collection of nine compact objects in solid matte primaries, each a single bold gesture: a fold, a facet, a rib, a cut. Scaled for consoles, desks, shelves and walls, every piece ships light and lands with the confidence of color.

ORGANIC

Stillwater

Pebbles, folds and melted stone, hand-laid

Stillwater is a collection of nine small hand-laid fiberglass objects shaped after river pebbles, slow folds and stone that has softened in the sun. Each piece is a seamless shell with one honest base and a back that tells its own story.
